

ZaliHealth

Your Health, your way.

Patient Information Guide

What is Zali Health?

Zali Health is a new healthcare hub that provides Australians with high-quality, affordable healthcare services.

It offers a wide range of services such as:

- Primary Care
- Urgent Care
- Mental Health
- Vaccinations
- Chronic Conditions

As well as specialised services such as:

- Women's Care
- Skin Care
- Aged Care
- Plant Therapy
- Allied Healthcare
- Workplace Occupational Health

and many more.

Zali Health aims to provide everyone with quality healthcare regardless of income or location.

Why Choose Zali Health?

Zali Health is unique in a number of ways.

Firstly, it offers high-quality, affordable healthcare services at a fraction of the cost of traditional healthcare providers.

Secondly, it makes it easy to book appointments and manage care online through its website or mobile app.

Thirdly, Zali Health has a team of experienced healthcare professionals who provide a wide range of specialties, including women's health, skin care, workplace and allied health care, care for seniors, and medical cannabis.

Lastly, it offers a wide range of resources to help patients learn more about their health and make informed decisions about their care.

What benefits can Zali Health offer to patients?

Zali Health can offer a range of benefits to patients such as:

- Easy access to high-quality, affordable healthcare services
- The ability to book appointments and manage care online
- A wide range of specialties
- Access to a library of articles, videos and podcasts to help patients learn more about their health and make informed decisions about their care.

In addition, benefits also includes:

“Convenient”, Zali Health is available 24/7, so you can get the care you need when you need it.

“Affordable”, Zali Health is much more affordable than traditional healthcare

“High-quality”, Zali Health’s doctors are all board-certified and experienced.

“Personalised”, Zali Health’s doctors take the time to get to know you and your individual needs.

What services/ care does zali health offer?

Zali Health offers a wide range of services such as Primary Care, Urgent Care, Women's Care, Allied Health and more ...

Women's care services Venus Women's Clinics create a safe space for women to receive excellent, holistic, and affordable healthcare. We provide the best in reproductive and sexual health diagnosis, prevention and management, and treatments.

Aged care services At Health In-Care, we are committed to providing compassionate and individualised care for elderly. We recognize that growing older can bring its own set of problems and complexities. This is why we believe in a holistic approach to care considering not only the Physical Health of our patients but also their emotional well-being. At Health In-Care, we are dedicated in providing every senior with the highest standard of care. Achieving this is done by working closely with residential aged-care facilities to ensure a seamless and integrated approach to care. We also believe in the importance of preventive care and strive to empower our patients to take control of their own health.

Plant therapy services Can-a-bliss is a comprehensive healthcare solution run by an experienced team of health professionals that specialised in medicinal cannabis treatments. Our mission is to create a seamless and supportive health-care experience that empowers patients to explore alternative treatments in a secure and accessible manner.

What is the consultation process?

The consultation process using Zali Health is simple and straightforward.

To book a consultation, simply create an account and follow these steps:

1. Select the type of consultation you need.
2. Fill out a short questionnaire about your health concerns.
3. Choose a time and date for your consultation.
4. Pay for your consultation

Once you have booked your consultation, you will receive a confirmation email with instructions on how to join the video call. During the video call, the doctor will ask you more questions about your health and make a diagnosis. If necessary, the doctor may prescribe medication.
